## **DETAILED ACTION**

### ***Response to Amendment***

1. The preliminary amendments filed on 4/23/01 and 5/7/01 have been received and made of record in the application file wrapper. The abstract has been added, claims 1-40 have been canceled and claims 41-78 have been added.

### ***Information Disclosure Statement***

2. The information disclosure statement filed 9/17/01 has been received and made of record in the application file wrapper. Note the acknowledged PTO-1449 enclosed herewith.

### ***Drawings***

3. The corrected or substitute drawings were received on 1/8/02. These drawings are approved by the examiner.

### ***Double Patenting***

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double

patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 41-49, 59-67 and 73-75 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 6, 7, 10-13, 16, 17, 29 and 31-34 of U.S. Patent No. U.S. Patent No. 6,124,522 ("the '522 patent"). Although the conflicting claims are not identical, they are not patentably distinct from each other because the application claims are merely broader in scope. As such, the patented claims anticipate the application claims.

As regards claims 43, 74 and 75, the claims of the '522 patent fail to teach that the release layer is centrally disposed on the bottom backing sheet, that the cohesive bonding material is non-adhesive and that the bonding material need only be applied to either the bottom backing sheet or the top support sheet in order to permit the bottom backing sheet and the top support sheet to be releasably attached to one another.

The examiner contends that one having ordinary skill in the art would have been motivated to place the release layer on the bottom backing sheet at any location thereon so long as the adhesive layer or any layer desired to be protected is covered. Such a modification is an obvious design choice, which does not patentably distinguish applicant's invention.

Additionally, absent a critical teaching and/or a showing of unexpected results derived from constructing the cohesive material from a non-adhesive material, the examiner contends that the material used for the cohesive material is an obvious design

choice which does not patentably distinguish applicant's invention. Furthermore, the applicant should note that the application of the bonding material to either the backing sheet or the top support sheet in order to permit the two sheets to be releaseably attached to one another is within the level of ordinary skill in the art.

***Allowable Subject Matter***

6. Claims 50-58, 68-72 and 76-78 are allowed.
